Illini Hospital

Moline, Illinois

Tia Sellevold, RN, BSN

Illini Hospital is located in Moline, IL and is part of the Genesis Medical Center. There are two other main campuses located in Davenport, IO which house most of the multispecialities.

The ED is a Level II trauma center with 13 beds. The staff consists of approximately 40 full and part time nurses. The ED houses the ambulance service as well. The yearly census is 23,000 but keeps climbing.

Illini Hospital is located between three interstate highways, I-80, I-88, and I-74, thus, resulting in receiving a good share of trauma patients. In addition, the ED is a pediatric trauma center, a stroke center and a chest pain center for AMI alert with emergency catheterization capabilities.

Since the Davenport campuses achieved Magnet status two years ago, our campus is striving to achieve this status as well.
